

How can I help my institution members tailor their grant recommendations?

After creating researcher profiles for your institution, you can help make sure that the grant recommendations your members are receiving are tailored to their research needs. Educate your institution members so that they know how to edit their research interests and use advanced filters to tailor their recommendations.

1. Edit and add research interests

Researchers can edit their researcher profile to delete any irrelevant research interests and add new relevant research interests. A research interest derived from publications may sometimes be outdated (from previous publications) or too broad (e.g., "informatics"). Check the automatically-derived keywords and key phrases, and update them to make sure their relevance to the current research of the researcher.

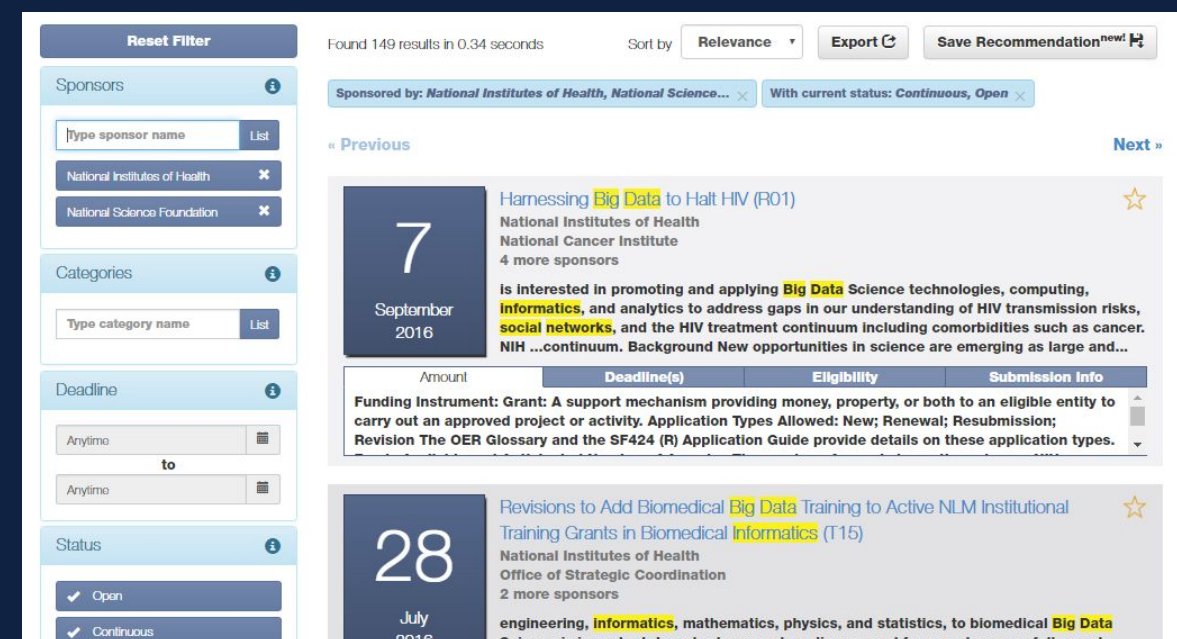

Uncheck any Improper or Irrelevant keywords below to make them disappear after finishing editing your profile.

<input checked="" type="checkbox"/> Artificial Intelligence	<input checked="" type="checkbox"/> Big Data	<input checked="" type="checkbox"/> Informatics
<input checked="" type="checkbox"/> User Profiling	<input checked="" type="checkbox"/> Event Detection	<input checked="" type="checkbox"/> Data Mining
<input checked="" type="checkbox"/> Unifying Databases	<input checked="" type="checkbox"/> Database Systems	<input checked="" type="checkbox"/> Prototype System
<input checked="" type="checkbox"/> Relational Entity	<input checked="" type="checkbox"/> Scheduled Approximation	<input checked="" type="checkbox"/> Feature Mapping
<input checked="" type="checkbox"/> Privacy Risk	<input checked="" type="checkbox"/> Heterogeneous Information	<input checked="" type="checkbox"/> Enabling Cross
<input checked="" type="checkbox"/> Social Network	<input checked="" type="checkbox"/> Analysis System	<input checked="" type="checkbox"/> Query Processing
<input checked="" type="checkbox"/> Digital Libraries, Digital Library	<input checked="" type="checkbox"/> Large Scale Integration	<input checked="" type="checkbox"/> Information Sharing
<input checked="" type="checkbox"/> Form Assistant	<input checked="" type="checkbox"/> Ensemble Approach	<input checked="" type="checkbox"/> Relational Database Management Systems
<input checked="" type="checkbox"/> Finding Ways	<input checked="" type="checkbox"/> Access Cost	<input checked="" type="checkbox"/> Information Integration
<input checked="" type="checkbox"/> Database Research	<input checked="" type="checkbox"/> Knowledge Discovery	<input checked="" type="checkbox"/> Mining Approach
<input checked="" type="checkbox"/> Knowledge Management	<input checked="" type="checkbox"/> Design Rationale	<input checked="" type="checkbox"/> Data Translation

2. Use advanced filters to update grant recommendations

Researchers can view their grant recommendations and add advanced filters to further refine their grant recommendations. For example, if a researcher is mostly interested in grants from specific sponsors such as NSF or NIH, they can tailor their grant recommendations to only include grants from those sponsors.
